## SUMMARY

I'm a B.Tech Computer Science student specializing in Artificial Intelligence, with hands-on experience in Python and machine learning basics. I've worked on a few academic projects involving data analysis and AI models, and I'm genuinely interested in applying what I've learned to real-world problems. I'm looking for an opportunity where I can keep learning, contribute to meaningful work, and grow as part of a tech-focused team.

## EDUCATION

**Bachelor Of Technology (B Tech)** 2022-2026  
*G Pullaiah College Of Engineering and Technology*

- Computer Science and Artificial Intelligence
- CGPA : **8.78**

**Intermediate** 2020-2022

Narayana Junior College

Percentage : **92%**

## TECHNICAL SKILLS

### Programming Languages

- Java
- Python
- SQL

### Web Technologies:

- HTML
- CSS

## PROJECTS

### Job Recommendation System

- Personal Project | Python, Machine Learning, Pandas, Scikit-learn
- Built a machine learning model that recommends relevant job roles to users based on their skills, education, and experience.
- Preprocessed user profile and job listing data using NLP techniques to extract key features.

### College Website question papers

- Developed a college website providing access to previous year question papers for students
- Using HTML, CSS, and JavaScript.

## INTERSHIPS

### System Administrator Intern — ServiceNow (SmartBridge)

- Gained hands-on experience in user administration, incident management, and workflow automation
- Configured and maintained forms, tables, and access controls to streamline business processes and improve efficiency.
- Assisted in developing catalog items and ITSM workflows using ServiceNow Studio.

## CERTIFICATIONS

Fundamentals in Deep Learning-nvidia

Java Programming-CODETANTRA

Introduction to Artificial Intelligence-IBM

## ADDITIONAL INFORMATION

- Problem Solving
- Quick Decision Making
- User Interaction
- Time Management
